St. JOSEPH HOSPITAL
TO LIVE IS A PRIVILEGE

Message from the Chairman

At our hospital, we believe healthcare is not just about treating illness, but about caring for people and building a healthier community.

We are truly humbled and proud to be the only private hospital in our community actively extending its care beyond medical services through meaningful social initiatives. Through our Wellness Center, we focus on children's health, early detection, health awareness, and preventive healthcare.

We are grateful that the trust and support of those who choose our hospital for their healthcare needs enable us to continue these valuable social initiatives. Every service you receive from us becomes a part of this greater purpose.

Our greatest achievement is not only the care we provide, but the lives we touch and the positive difference we make in society.

Thank you for being part of our journey towards a healthier tomorrow.

Chairman - Mr. Sunil De Silva
